

Computer Forensic Services

Conveniently situated in the centre of the UK, MD5's state of the art computer lab is law enforcement security vetted and accredited to ISO17025.

Our security cleared (CTC level) forensic experts are highly regarded in the computer forensic arena, developing leading edge forensic software tools such as Virtual Forensic Computing (VFC). All work is fully compliant with ACPO standards.

Forensic investigators have accumulated a vast amount of knowledge and experience, providing highly technical reports in an understandable format .

We are constantly striving to enhance and improve the service to our clients, and have recently invested in specialist training to enable us to deal with damaged/malfunctioning hard disk drives which forensic software tools would often fail to read.

The forensic computing unit has recruited additional experienced investigators which allow us to provide urgent support to organisations nationwide with any backlog or outsourcing requirements.

MD5 offer different levels of service depending upon the needs of the organisation. Including:-

- corporate clients
- legal sector
- defence work
- IP theft
- police investigations

Digital Evidence can be used in criminal cases, civil disputes and human resources/employment tribunal proceedings.

MD5 are constantly researching technology to enhance its investigative and forensic capabilities.

For any type of investigation please call us for further information or a quotation on 01924 220999.

Registered Expert Witness

All our work adheres to the ACPO 'good practice guide for computer based electronic evidence'. We are registered with Sweet & Maxwell as computer forensics expert witnesses.

Fully Trained and Security Cleared Investigators

MD5 investigators have over 50 years of accumulated experience from both law enforcement and corporate computer forensic backgrounds. Additionally, all investigators are security cleared to CTC level.
